Connecting Opportunities. Creating Impact.

Biratnagar Incubation Center

Why Koshi Province needs a place where an idea can be taken seriously.

INTRODUCTION. The Biratnagar Incubation Center (BIC) is the incubation centre of the Chamber of Industries Morang, run by its Entrepreneurship Academy and Innovation Unit. It supports entrepreneurs across Koshi Province — from school students meeting the idea of enterprise for the first time, to established businesses preparing for investment — with mentoring, structured programmes, market access and investor linkage.

CIM has convened industry in eastern Nepal since 1969 and has run Birat Expo since 1996. BIC applies that same convening power to the one thing the province has never had: a single, continuous path from a first idea to a financed enterprise.

Why we are doing this

1. Ideas exist. Pathways do not.

Koshi has no shortage of young people with ideas or of families running small businesses. What is missing is somewhere to take an idea next. Without a pathway, an idea stays a conversation.

2. The first gap is readiness, not money.

Finance exists — bank credit, the State Startup Enterprise Loan, local angel investors. Most enterprises cannot reach it because the books, the plan and the compliance are not in order. Readiness is the bottleneck.

3. Industry and academia sit side by side and never meet.

Colleges teach business; industries need problems solved. A chamber of industries is the one institution that can put a student in front of a real industrial problem, and a mentor in front of a student.

4. One-off events do not compound.

A workshop that ends on the last day leaves nothing behind. BIC is built so that every activity hands something to the next one — and so that each year starts further ahead than the last.

> BIC is not a new programme competing for budget. It is the Chamber's existing work on entrepreneurship — school sessions, college workshops, incubation cohorts and the Expo — **put in order, so that each part feeds the next.**

CIM's own **Guidebook for Incubation Managers** states that an incubation centre must run as a public–private partnership across **academia, government and industry**. The three rooms are that principle made physical: a school in Room 1, a college in Room 2, and the Chamber's own membership in Room 3.

The work so far

Five years of incubation delivery at the Chamber of Industries Morang, 2021 to 2026.

Milestones

S.N.	When	What we did	What it produced
1	January 2021	Mentorship Guidebook adopted	The Chamber's first written standard for mentor–mentee matching, agreements and conduct
2	2021–22	Cohort 1 — an 18-month incubation pilot, delivered with Antarprerana Pvt Ltd	A working four-phase model: Orientation, Shape, Strengthen, Sustain, ending in a Demo Day
3	30 January 2022	Curriculum and Guidebook for Incubation Managers published	Incubation became institutional rather than project-based; the Business Health Check-up instrument
4	2022–23	Cohort 2 — redesigned to 12 months, sector agnostic, 20–25 participants	Five bootcamps, three rounds of mentor training, a product showcase, an investors' meet and a Demo Day
5	January 2025	Startup Hackathon “Innovate for Koshi Province”, at Birat Expo 2025, with King's College Innovation Kitchen	30 ideas registered, 10 teams selected, a seven-day conference and three winning ventures
6	January 2025	First entrepreneurial mindset session in a school	42 students of grades 7 and 8 at Lilliput School — the seed of Room 1
7	October 2026	“Empathy to Enterprise” design thinking workshop, with Mahendra Morang College	Seventeen sessions, five student teams, field interviews, a farm visit and pitches to an industry panel — Room 2 in practice
8	Oct–Nov 2026	BIC SGB Accelerator 2026, for registered businesses of Koshi Province	A two-month accelerator taking working businesses to a business plan and an investor pack — Room 3 in practice

> Read as a list, that is a strong record. Read as a system, it was five separate starts. **The three-room pavilion is the first time all of it is presented as one connected pathway.**

1. Concept

Three rooms. One pavilion — ten days to walk the whole path from a first idea to an investment-ready business.

The **Startup & Entrepreneurship Pavilion** is the Biratnagar Incubation Center put on a public stage at **Birat Expo 2026**. Three rooms, open to everyone. Walk in at fourteen with a problem you have noticed, and walk out of the third room as a business that is ready for investment.

The three rooms

ROOM 1
The Makerspace

School students, grades 7–10

Entrepreneurship and problem-solving, learned early — by making things with your hands.

CURIOSITY

ROOM 2
The Design Studio

College students and young adults

Design thinking, end to end: find a real problem, test it with real people, build a solution.

CAPABILITY

ROOM 3
The Growth Room

Small and Growing Businesses

Finance, compliance, marketing and scale — until the business is ready to be invested in.

CAPITAL

250,000+	25,000	3	10
Expo visitors across ten days	Students engaged at the Expo	Rooms, staffed every day	Days, 17–26 December

Curiosity → Capability → Capital

2. Why three rooms?

Each room hands something to the next. A student who makes a prototype in Room 1 arrives in Room 2 already knowing how to look for a problem. A team that validates an idea in Room 2 arrives in Room 3 with something a bank or an investor can read. One pipeline, not three programmes — and a visitor can see the whole of it in a single walk.

3. The visitor journey

Step	Where you are	What happens	What you leave with
1	**Information desk**	A map of the three rooms, and one short question: which room is yours?	A route through the pavilion rather than a wander
2	**Room 1 — Makerspace**	Build something at the maker bench; read the student project wall	Proof that a problem can be solved with your own hands
3	**Room 2 — Design Studio**	Watch a team work; let students interview you about a problem you face	An understanding of how a real idea gets tested before it is built
4	**Room 3 — Growth Room**	Meet trading businesses; sit a free Business Health Check-up	A read on whether your own business is investment-ready
5	**Enquiry desk**	Register as a participant, a mentor, a sponsor or an investor	A named follow-up — we call you after the Expo closes

4. The pavilion layout

One bamboo structure, three zones, a single route — so a visitor can walk the whole pipeline in one line, without doubling back.

Design render — Startup & Entrepreneurship Pavilion, Birat Expo 2026. Bamboo frame on a raised timber deck, open to the hall on the visitor side. The banners carry the action word for each zone; the arrows on the deck mark the visitor route from Zone 1 through to Zone 3.

1. THINK — Maker Space

Room 1 · The Makerspace

Maker benches, tool wall, 3D printers and the student project display

CURIOSITY · GRADES 7–10

2. BUILD — Boot Camp

Room 2 · The Design Studio

Work tables, laptops, whiteboards and a presentation screen

CAPABILITY · COLLEGE STUDENTS

3. GROW & INVEST

Room 3 · The Growth Room

Product display shelving, a large screen and meeting seating for investors

CAPITAL · SMALL & GROWING BUSINESSES

Layout & key details

S.N.	Element	Specification
1	Structure	Bamboo frame with an open truss roof, raised timber deck, open to the hall on the visitor side
2	Arrangement	Three zones in one continuous run, with a single entry and a single exit — no zone is a dead end
3	Visitor flow	A marked route on the deck leads from Zone 1 to Zone 3 and finishes at the enquiry desk
4	Signage & equal footing	One overhead banner per zone carrying its action word — same height, same deck finish, same power and data for all three
5	Staffing	Each zone staffed for all ten days, with its own enquiry desk recording who walked away interested

> The build does the argument for us. **Three zones under one roof, with one route through them** — a visitor does not need the booklet to see that this is a single pipeline.

5. Inside the three rooms

What happens in each room all year — and what you can see and do in it during the ten days of the Expo.

01 The Makerspace

Where problem-solving starts at fourteen

CURIOSITY

WHO IT IS FOR

Students of grades 7–10, from schools across Morang and Koshi Province — with their teachers.

WHAT WE DO ALL YEAR

- Hands-on making: students build, test and rebuild a real object
- Empathy, problem definition and prototyping taught through play — no business plans, no pitch decks
- Teachers given the kit and handbook, so the school can run it again

AT THE PAVILION

- A live maker bench — school groups build something in thirty minutes
- The student project wall: what children in Koshi actually chose to solve
- Guided tours for school groups, with young founders on hand

ALREADY DONE

The first session reached **42 students of grades 7 and 8 at Lilliput School**, Biratnagar — a two-hour activity in which every child made a gift for a friend, and learned to ask what that friend actually needed.

02 The Design Studio

Empathy to enterprise — design thinking, end to end

CAPABILITY

WHO IT IS FOR

College and university students and young adults of any discipline, across Koshi Province.

WHAT WE DO ALL YEAR

- Problem cards drawn from real industry gaps — agriculture, banking, manufacturing
- Field interviews with real people, empathy maps and a “How might we” question
- Crazy 8s, solution mapping, prototyping at the Incubation Center, then pitch day before an industry panel

AT THE PAVILION

- Teams working live — you can watch a problem turn into a prototype
- Be interviewed: students will ask you about a problem you face. That is the method
- The Crazy 8s wall, and live student pitches on the Compete days

ALREADY DONE

Empathy to Enterprise, October 2026, with Mahendra Morang College — seventeen sessions, five student teams, field interviews with real users, an agricultural site visit to Hulas Farm, prototyping at the CIM Incubation Center, and final pitches to an industry panel.

03 The Growth Room

Taking a working business all the way to investment-ready

CAPITAL

WHO IT IS FOR

Registered Small and Growing Businesses of Koshi Province — trading for a year or more, with their own product or service.

WHAT WE DO ALL YEAR

- A Business Health Check-up, to find what is really holding the business back
- Workshops on finance, legal and compliance, marketing, operations and scaling up
- One-to-one clinics with accountants, lawyers and marketing specialists, ending in a business plan and investor pack

AT THE PAVILION

- Business stalls selling to real customers on the Market days
- Live pitches to investors and financiers of the CIM network on Invest day
- Free clinics: meet the accountants, lawyers and bankers yourself

RUNNING NOW

The **BIC SGB Accelerator 2026** — a two-month programme running October to November 2026 for registered businesses of Koshi Province. Its graduating businesses are the ones you will meet in this room.

6. What is on

All three rooms are open and staffed for all ten days. Only the scheduled programme changes from day to day.

17–18 DEC Discover	19–20 DEC Build	21–22 DEC Compete	23–24 DEC Market	25 DEC Partner	26 DEC Invest
Guided tours for school and college groups	Live prototyping and maker demonstrations	Student pitch stage and the innovation challenge finals	Business stalls, real customers, B2B meetings	MOU signings and the Koshi entrepreneurship roundtable	Investor day, business pitches and closing awards

7. How to take part

SCHOOLS & TEACHERS

Book a class visit, or a session at your school

Bring grades 7–10 on a guided tour of Room 1 during the Discover days, or ask us to run a maker session at your own school in the new year. Free of cost.

COLLEGE STUDENTS

Join the next Design Thinking workshop

No business idea needed, and no fee. Leave your name at Room 2 and we will tell you when the next workshop opens in your college.

BUSINESS OWNERS

Apply for the next SGB Accelerator

For registered businesses of Koshi Province trading for a year or more. Start with a free Business Health Check-up at Room 3 — any day of the Expo.

INDUSTRY, INVESTORS & PARTNERS

Mentor, sponsor a booth, or back a founder

CIM members can give a few hours a month as a mentor, sponsor a stall for a young business, or meet investment-ready businesses on Invest day. Ask us how to support a founder.

> Every room runs the same three things on repeat: a live demonstration, something any visitor can try, and an enquiry desk that records **who walked away interested.**

8. After the Expo

The pavilion does not end on 26 December. Every enquiry taken at the three desks is counted and followed up: **schools are offered a session date**, **students are told when the next workshop opens in their college**, and **businesses are booked for a Business Health Check-up.** Visitor numbers, enquiries and enrolments are compiled into one report and shared with CIM members and partners.
